

Notice: A Renewal of Monitor Crystal Case (10pcs)

We would like to inform you that our 10 pieces monitor crystal case has been renewed.
Please see further information below.

1. Advantage of this renewal

To shorten and make the process of loading crystals into the holder easier!

Our former case needs to be rotated one by one to load each crystal.

You need to rotate the upper lid 10 times accordingly.

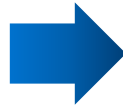

However, our renewal case's lid can be opened and all 10 crystals will be directly facing you.

So that, no more extra rotating work!

New package

Former case

Renewal case

3. How to handle

①Tear anywhere to remove it from the plastic bag

②Rotate the lid slightly to your left side.

③Remove the lid properly. (Please do not drop the crystals)

④Load the crystal into the holder

※Please Do Not Harm the Crystal Electrode When Handling!
